PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience managing agile workflows, backlog prioritization, and sprint operations across global teams. Combines product management expertise with technical background as a former Senior Software Engineer to translate business goals into actionable tasks, maintain delivery velocity, and ensure process excellence.

WORK EXPERIENCE

Full Stack Developer and Product, Kaizntree (NYU Startup)

New York, USA | July 2025 - October 2025

- Managed day-to-day backlog organization and sprint tracking in Jira, ensuring alignment between roadmap priorities and engineering deliverables.
- Coordinated daily standups, sprint planning, retrospectives, demos with distributed teams across the US and India.
- Partnered with product lead and engineers to document requirements, define acceptance criteria, and resolve blockers, improving sprint completion rate by 30%.
- Maintained sprint dashboards and reported on velocity, burndown rate, and issue trends to leadership.
- Documented process improvements after each sprint, reducing QA turnaround time by 40% and enhancing release predictability.

Product Development Intern, Pickleball Minds (Startup)

New Jersey, USA | Jun 2024 – August 2024

- Supported product planning by creating user stories, backlog items, and feature specs based on stakeholder feedback.
- Collaborated with cross-functional leads to define MVP scope and translate business goals into actionable Jira tickets.
- Led weekly progress syncs across onshore (US) and offshore (India) developers, ensuring visibility into blockers and deliverables.
- Helped design and document the product roadmap and sprint calendar, contributing to on-time delivery of the networking platform launch.
- Created reports to track sprint progress and completion metrics, helping inform leadership prioritization decisions.

Senior Software Engineer, John Deere

Pune, India | August 2020 - August 2023

- Partnered with PMs and UX designers to translate product requirements into technical tasks, coordinating sprint goals for multiple scrum teams.
- Managed Jira-based workstreams across teams, ensuring all tasks had clear definitions of done and met acceptance criteria.
- Improved delivery velocity through CI/CD automation, leading to 20% faster release cycles.
- Collaborated across global teams in the US and India to balance roadmap work with technical debt resolution.

TECHNICAL SKILLS

Agile & Process Management: Sprint Planning, Jira Administration, Backlog Grooming, Velocity Tracking, Cross-Team Coordination, Retrospectives, Continuous Improvement.

Product Operations: Requirement Documentation, User Stories & Acceptance Criteria, Roadmap Alignment, OKR Tracking, Stakeholder Communication.
